

**COMSAT LABORATORIES - MARYLAND**

**CLIENT:** Comsat

**DESCRIPTION:** *This building complex houses all necessary functions for research, development, and production of communication satellites. The plan is generated by the circulation needs, solved by arrangements of six basic research laboratories plus offices about a central spine. Future expansion will occur by continuing the spine and adding laboratory space.*

**ROLE:** Anthony Lumsden was the Design Architect of this project.

**STATUS:** Project is built.
