

JAKARTA MASTERPLAN
JAKARTA, INDONESIA

CLIENT: Dacrea Design and Engineering
COMPLETION: 1991 (Design)

DESCRIPTION: Master plan for a 400-acre site outside Jakarta, Indonesia. The large-scale mixed-use development master plan includes provisions for housing, office buildings, hotels, retail, industrial park, and convention center and recreation activities. The organization of the plan allows incremental development related to market demand. Each component of program can be plugged into the defined circulation and infrastructure.

ROLE: Anthony Lumsden was the Design Architect of this project.
STATUS: Project was placed on hold after concept design
