

Pedestrian Bridge – Ontario, California

CLIENT: Los Angeles World Airports
COMPLETION: 1996

DESCRIPTION: *The bridge serves a high traffic intersection and off-ramp from the I-10 interstate freeway serving the Ontario International Airport. The 110 foot bridge structure rests on gently inclined handicap accessible ramps formed into landscaped berms. The bridge structure consists primarily of standardized off-the-shelf steel sections that can be prefabricated and dropped into place with minimal on-site welding.*

COST: \$750,000
