

CALIFORNIA STATE UNIVERSITY LOS ANGELES OVERPASS- LOS ANGELES, CALIFORNIA

CLIENT: City of Los Angeles
COMPLETION: 1975

DESCRIPTION: This pedestrian overpass spans across the westbound side of the 10 freeway in Los Angeles adjacent to California State University Los Angeles. The steel and concrete pedestrian bridge serves as a pedestrian circulation link between the school and bus stop. Pedestrian circulation to the buses is via an elevated bridge or near side platform, eliminating traffic crossings. The end towers house elevators and stairwells.

COST: \$ 1 million

ROLE: As former Corporate Director of design for DMJM, Anthony Lumsden was responsible for the architectural design.

STATUS: Project is built
